

# US Capital Strength Portfolio, Series 27

## Investment Objective

The US Capital Strength Portfolio, Series 27 (Trust) seeks to provide total return through capital appreciation.

## Key Considerations

- **Hedge Volatility with Quality:** Guggenheim believes that high-quality stocks that have a track record of strong, consistent profitability offer the potential to demonstrate performance leadership in periods of rising market volatility.
- **Strength:** The Trust favors companies that employ less leverage than their peers while generating strong cash flow. To the potential benefit of investors, Guggenheim feels companies with high levels of cash may be in a good position to invest, acquire new companies, and buy back shares.
- **Competitive Advantage:** Companies chosen for the portfolio have demonstrated over several years higher returns on capital. Guggenheim believes this implies strong management and competitive advantages within their respective industries.

**Past performance does not guarantee future results.** There is no guarantee that these trends and projections will come to fruition and they are subject to change.

## SECTOR WEIGHTINGS

Industrials	19.93%
Information Technology	19.90%
Health Care	13.35%

Communication Services	3.35%
<b>Total</b>	<b>100.00%</b>

## Value and Quality for U.S. Growth Opportunities

High-quality stocks are generally identified as shares of well-capitalized, highly profitable companies with minimal debt exposure. These companies are typically valued for their flexibility to use excess profits that may be distributed in the form of dividends to shareholders or invested in potential growth opportunities.

Guggenheim's US Capital Strength Portfolio was created to provide efficient exposure to companies believed to be well-capitalized and of high quality. The Trust utilizes a comprehensive methodology seeking to construct a diversified portfolio of attractively valued U.S. companies with strong balance sheets and consistently high profitability.

## Security Selection

### Starting Universe

Begin with all stocks listed on a major U.S. exchange.

### Rank on Capital Strength

Review companies for historical return on equity and overall debt levels versus the overall market or industry peers.

### Company Review and Selection

Identify the largest 30% of companies and select companies from each sector that display attractive valuations, expected growth and risk outlook.

### Final Portfolio

US Capital Strength Portfolio

## Portfolio Allocation

Reinvest	40177V633
Fee/Cash	40177V641
Fee/Reinvest	40177V658
Ticker	CUCABZ

<sup>1</sup>The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. <sup>2</sup>The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing June 2024 and ending August 2024 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. <sup>3</sup>For unit prices other than \$10, percentage of the C&D fee will vary.

The US Capital Strength Portfolio, Series 27 is a Unit Investment Trust.

**RISK CONSIDERATIONS:** As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market values of the Trust's securities fluctuate in response to various factors affecting an issuer. Additionally, events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies are impossible to predict and may adversely affect the economy, various markets and issuers, which may negatively impact the performance of the Trust and the Trust's ability to achieve its investment objectives. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. • The Trust invests significantly in the consumer products sector. As a result, the factors that impact the consumer products sector will likely have a greater effect on this Trust than on a more broadly diversified trust. General

risks of companies in the consumer products sector include cyclicity of revenues and earnings, economic recession, currency fluctuations, changing consumer tastes, extensive competition, product liability litigation and increased government regulation. A weak economy and its effect on consumer spending would adversely affect companies in the consumer products sector. • The Trust invests in securities issued by mid-capitalization companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating

expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

**Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing.
